STEAM AND WATER SEPARATOR type SRZ

pressure series PN6, PN16, PN40, PN64

Separators are mainly used to separate steam (water) from one or several sources from separate piping lines.

Separators can be delivered together with valves and fittings, base unit and insulation.

Material: materials of classes 11, 12, 15, 17

To order a separator dimensions, distances of connections and their inside diameter must be specified, if necessary, we can propose dimensions of the separator.

Separators can be delivered together with a base unit and insulation.

Dimensions listed in the table are informative and are decided upon according to specific requirements.
