THERMAL OIL BOILERS type SKT

Boiler type	Boiler output (kW)	A (mm)	B (mm)	C (mm)
100	110	1000	1300	1000
150	160	1000	1500	1000
200	230	1000	1800	1000

Thermal oil boilers are determined for a heating of oil for technological purposes. Boilers are designed as fire-tube ones with a turning flue and one draught of fire tubes. Boilers are fully equipped and delivered together with all the necessary equipment. We equip boilers with new and overhauled burners (catalogue p.22), instrumentation and systems (catalogue p.25), etc. Other boiler capacities upon request.

Schema is just informative.
